The facts: Devco Corporation is classified as “small business” by the Federal Govt.

Devco was a supplier to Delphi. Devco furnaces machine repair parts used on Delphi production machinery. Delphi placed an order for the amount in question covering Devco parts in stock for immediate shipment to Delphi. In good faith, Devco shipped a complete set of repair parts to Delphi in order that Delphi could operate their equipment. As was customary with Delphi and other Devco customers in good standing, Devco billed Delphi for the parts and expected payment within Devco's 30 day terms. Devco has never been paid for these parts ordered, delivered, and presumed used by Delphi. Devco is entitled to full reimbursement for the goods it sold to Delphi in good faith.
